at the beginning of the twentieth century psychologists discovered ways and means to measure intelligence that developed into an obsession with iq in the mid 1990 s daniel goleman popularised research into emotional intelligence eq pointing out that eq is a basic requirement for the appropriate use of iq in this century there is enough collective evidence from psychology neurology anthropology and cognitive science to show us that there is a third q sq or spiritual intelligence sq is uniquely human and the authors argue the most fundamental intelligence sq is what we use to develop our longing and capacity for meaning vision and value it allows us to dream and to strive it underlies the things we believe in and the role our beliefs and values play in the actions that we take and the way we shape our lives
